<i>Technologies</i>	Core PHP,Sql,Moodle,Magento
<i>Team Size</i>	6
<i>Role</i>	Developer
<i>Period</i>	October 2013 –TillDate

**PROJECT DESCRIPTION**

Growmore is an online store where all kinds of books are made available to groups like institution and students. The groups can subscribe to these books directly or via the institutions. Discounts are provided to students coming via institution. Non-Institution students can also buy these books. They can subscribe to these books based on their use like part subscription or full licensed subscription etc. People across the globe can buy these books easily.

Growmore has a very good library of books categorized in a very systematic order. It is easy for the users to search and locate the books. All advance search options are made available to users. The site is to be made available both in English and Arabic versions. Both general and curriculum books are available with growmore. They also provide books from third party organizations directly in the growmore site. Users can pay online and subscribe to the growmore books.

### **ROLES AND RESPONSIBILITIES IN THE PROJECT**

- Requirement analysis, coding and documentation.
- Functional testing.
- Created common database.
- Bug Fixing to the application
- Shopping cart using payments with magento
